- Sample programming
- Test your concepts in our laboratory in Chicago.
- Request MRC controller and software training

**Learn More About  
OVR Robots**

## MRC Controller Software Downloads

**Download Free MRC Studio  
Programming & Simulator Software**

MRC Reality: Using a smartphone/tablet or head-mounted display, a virtual robot can be installed and operated in a real space. By actually trying the robot in the location where you want to install it, you can visually confirm the movement of the robot arm, the size of the robot arm when installed, and the space required for its movement.

Smartphone/Tablet to Use **Available for iOS only**
