Thank you for purchasing an Oriental Motor product. This Operating Manual describes product handling procedures and safety precautions.

- Please read it thoroughly to ensure safe operation.
- Always keep the manual where it is readily available.

### Safety precautions

The precautions described below are intended to prevent danger or injury to the user and other personnel through safe, correct use of the product. Use the product only after carefully reading and fully understanding these instructions.

#### Description of graphic symbols

- **WARNING** Indicates "prohibited" actions that must not be performed.
- **CAUTION** Indicates "compulsory" actions that must be performed.
- **Note** The items under this heading contain important handling instructions that the user should observe to ensure the safe use of the product.

#### Description of signs

<table>
<thead>
<tr>
<th>Sign</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="WARNING" /></td>
<td>Handling the product without observing the instructions that accompany a &quot;Warning&quot; symbol may result in serious injury or death.</td>
</tr>
<tr>
<td><img src="image" alt="CAUTION" /></td>
<td>Handling the product without observing the instructions that accompany a &quot;Caution&quot; symbol may result in injury or property damage.</td>
</tr>
</tbody>
</table>

#### Precautions for use

- **WARNING**
  - Do not use the product in explosive or corrosive environments, in the presence of flammable gases, locations subjected to splashing water, or near combustibles. This may cause fire or injury.
  - Do not forcibly bend, pull or pinch the lead wire or cable. This may cause fire.
  - Do not disassemble or modify the product. This may cause injury.
  - Assign qualified personnel the task of installing, wiring, operating/controlling, inspecting and troubleshooting the product. Failure to do so may result in fire or injury.
  - If this product is used in a vertical application, be sure to provide a measure for the position retention of moving parts. Failure to do so may result in injury or damage to equipment.
  - Install the product in an enclosure. Failure to do so may result in injury.
  - Connect the cables securely according to the wiring diagram.
  - For the power supply, use a DC power supply with reinforced insulation on its primary and secondary sides. Failure to do so may cause electric shock.

- **CAUTION**
  - Do not use the product beyond its specifications. This may cause injury or damage to equipment.
  - Keep your fingers and objects out of the openings in the product. Failure to do so may result in fire or injury.
  - Do not touch the product while operating or immediately after stopping. This may cause a skin burn(s).
  - Do not carry the motor by holding the motor output shaft, lead wire or cable. Doing so may cause injury.
  - Keep the area around the product free of combustible materials. Failure to do so may result in fire or a skin burn(s).
  - Leave nothing around the product that would obstruct ventilation. Failure to do so may result in damage to equipment.
  - Do not touch the rotating part (output shaft) while operating the motor. Doing so may result in injury.
  - Provide a cover over the rotating part (output shaft) of the motor. Failure to do so may result in fire.
  - Use a motor and driver only in the specified combination. Failure to do so may result in fire.
  - Provide an emergency stop device or emergency stop circuit so that the entire equipment will operate safely in the event of a system failure or malfunction. Failure to do so may result in injury.
  - When an abnormal condition has occurred, immediately stop operation and turn off the driver power. Failure to do so may result in fire or injury.
  - The motor surface temperature may exceed 70 °C (158 °F) even under normal operating conditions. If the operator is allowed to approach the running motor, attach a warning label as shown below in a conspicuous position. Failure to do so may result in a skin burn(s).

- **Note**
  - Do not use the product in explosive or corrosive environments, in the presence of flammable gases, locations subjected to splashing water, or near combustibles. This may cause fire or injury.
  - Do not forcibly bend, pull or pinch the lead wire or cable. This may cause fire.
  - Do not disassemble or modify the product. This may cause injury.

- **CAUTION**
  - Do not use the product beyond its specifications. This may cause injury or damage to equipment.
  - Keep your fingers and objects out of the openings in the product. Failure to do so may result in fire or injury.
  - Do not touch the product while operating or immediately after stopping. This may cause a skin burn(s).
  - Do not carry the motor by holding the motor output shaft, lead wire or cable. Doing so may cause injury.
  - Keep the area around the product free of combustible materials. Failure to do so may result in fire or a skin burn(s).
  - Leave nothing around the product that would obstruct ventilation. Failure to do so may result in damage to equipment.
  - Do not touch the rotating part (output shaft) while operating the motor. Doing so may result in injury.
  - Provide a cover over the rotating part (output shaft) of the motor. Failure to do so may result in fire.
  - Use a motor and driver only in the specified combination. Failure to do so may result in fire.
  - Provide an emergency stop device or emergency stop circuit so that the entire equipment will operate safely in the event of a system failure or malfunction. Failure to do so may result in injury.
  - When an abnormal condition has occurred, immediately stop operation and turn off the driver power. Failure to do so may result in fire or injury.
  - The motor surface temperature may exceed 70 °C (158 °F) even under normal operating conditions. If the operator is allowed to approach the running motor, attach a warning label as shown below in a conspicuous position. Failure to do so may result in a skin burn(s).
Preparation

Checking the product

Verify that the items listed below are included. Report any missing or damaged items to the branch or sales office from which you purchased the product.

- Motor .............................................. 1 unit
- Connection cable ................................ 1 pc. [0.6 m (2 ft.)] *
- OPERATING MANUAL ..................... 1 copy (this manual)

* Supplied with the PKP5-L types and the connector coupled type motor and driver packages

How to identify the product model

Check the model number of the motor against the number shown on the nameplate.

PKP5 1 2 3 4 N 5 6 7 8 9 - L

- Motor frame size
  1: 28 mm (1.10 in.)
  2: 42 mm (1.65 in.)
  6: 56.4 mm (2.22 in.) *
- Motor length
- Motor identification
  F: Motor frame size 60 mm (2.36 in.)
- Motor type
  None: Standard type
  M: High-resolution type
- Motor winding specification
  Representative example
  1B: Rated current 1.8 A/phase
  2A: Rated current 2.4 A/phase
- Shape
  A: Single shaft
  B: Double shaft
  M: With electromagnetic brake
- Output shaft diameter
  A: Imperial
  None: Metric
- Motor identification
  2: Model A
  None: Model B
  W: Model C
- Connection cable
  -L: Supplied with a connection cable
  None: Without connection cable

* The motor frame size is 60 mm (2.36 in.) when the model name is PKP56-F.

Names of parts

The pin numbers as well as the colors of lead wires are shown in the figures. The colors of lead wires show arrangement of colors of the connection cable (supplied or accessory).

Connection

- **Connector type motor**
  - When inserting the connector
    Hold the connector main body, and insert it in straight securely. Inserting the connector in an inclined state may result in damage to connector or a connection failure.
  - When pulling out the connector
    Pull out the connector in straight while releasing the lock part of the connector. Having the motor lead wires or pulling out the connector in a state of being locked may damage the connector.

**Note**
Secure the lead wires at the connection part to prevent the connection part from receiving stress due to the flexing of the lead wires or the lead wires' own mass. Also, do not excessively bend the lead wires near the connection part of the connector. Applying stress on the motor lead wires may cause poor contact or disconnection, leading to malfunction or heat generation.

- **Connection with the drivers of Oriental Motor**
  Refer to the following table when connecting with the drivers of Oriental Motor. “Color” in the table shows the colors of lead wires of the connection cable (supplied or accessory).

  The motors of the model A and model B are different in pin assignments. Wrong connection will not cause the motor to operate properly.

**Note**

- **Connection with the CVD driver**

### Installation

- **Location for installation**
  The motor has been designed and manufactured to be incorporated in equipment. Install it in a well-ventilated location that provides easy access for inspection. The location must also satisfy the following conditions:
  - Inside an enclosure that is installed indoors (provide vent holes)
  - Operating ambient temperature: −10 to +50 °C (+14 to +122 °F) (non-freezing)
  - Operating ambient humidity 85% or less (non-condensing)
  - Area that is free of explosive atmosphere or toxic gas (such as sulfuric gas) or liquid
  - Area not exposed to direct sun
  - Area free of excessive amount of dust, iron particles or the like
  - Area not subject to splashing water (rain, water droplets), oil (oil droplets) or other liquids
  - Area free of excessive salt
  - Area not subject to continuous vibration or excessive shocks
  - Area free of excessive electromagnetic noise (from welders, power machinery, etc.)
  - Area free of radioactive materials, magnetic fields or vacuum
  - 1,000 m (3,300 ft.) or lower above sea level

- **Installation method**
  The motor can be installed in any direction. Install the motor onto an appropriate flat metal plate having excellent vibration resistance and heat conductivity. When installing the motor, secure it with four bolts (not supplied) through the four mounting holes provided. Do not leave a gap between the motor and metal plate.

  - **Installation method 1**
  - **Installation method 2**

- **Installing a load**
  When connecting a load to the motor, align the centers of the motor output shaft and load shaft. Be careful not to damage the output shaft or bearings when installing a coupling or pulley to the motor output shaft.

- **Permissible radial load and permissible axial load**
  The radial load and axial load on the motor output shaft must be kept the permissible values listed in the table below.

**Motors of Model A**

<table>
<thead>
<tr>

**Maintenance/Inspection**

**Inspection**

It is recommended that periodic inspections are conducted for the items listed below after each operation of the motor. If an abnormal condition is noted, discontinue any use and contact your nearest Oriental Motor sales office.

During inspection

- Are any of motor mounting screws loose?
- Are there any abnormal noises in the motor bearings (ball bearings) or other moving parts?
- Are there any scratches, signs of stress in the motor lead wires?
- Are there any loose connections on the connector or driver?
- Are the motor’s output shaft and load shaft out of alignment?

**Warranty**

Check on the Oriental Motor Website or General Catalog for the product warranty.

**Disposal**

Dispose the product correctly in accordance with laws and regulations, or instructions of local governments.

**Specifications**

Check on the Oriental Motor Website for the product specifications.

**General specifications**

- **Degree of protection**: IP20
- **Operation environment**
  - Ambient temperature: −10 to +50 °C (+14 to +122 °F) (non-freezing)
  - Humidity: 85% or less (non-condensing)
  - Altitude: Up to 1,000 m (3,300 ft.) above sea level
  - Surrounding atmosphere: No corrosive gas, dust, water or oil
- **Storage environment, Shipping environment**
  - Ambient temperature: −20 to +60 °C (−4 to +140 °F) (non-freezing)
  - Humidity: 85% or less (non-condensing)
  - Altitude: Up to 3,000 m (10,000 ft.) above sea level
  - Surrounding atmosphere: No corrosive gas, dust, water or oil
- **Insulation resistance**: 100 MΩ or more when 500 VDC megger is applied between the case and motor windings.
- **Dielectric strength**: Sufficient to withstand the following conditions applied between the case and motor windings for 1 minute:
  - PKP52, PKP54: 0.5 kVAC 50/60 Hz
  - PKP56: 1.5 kVAC 50/60 Hz

* Motors of Model A: 1.0 kVAC 50/60 Hz

**RoHS Directive**

The products do not contain the substances exceeding the restriction values of RoHS Directive (2011/65/EU).

- Unauthorized reproduction or copying of all or part of this manual is prohibited.
